

Disha Patel is a senior information technology and business professional with extensive experience in life sciences/healthcare, government and non-profit domains. Disha is at Amgen Inc., a biotechnology company, where she has held diverse IT leadership roles, which include mentoring and developing teams and setting team and individual goals.

With nearly two decades of experience in technology and business, Disha has witnessed first hand the evolution of technology and its impact to organizations and society. In addition, Disha has a strong understanding and appreciation for business strategy, technology, design and user experience to deliver meaningful, value-driven products.

Her life science experience began at Eli Lilly and Co. and her technology experience began with the U.S. Air Force. Disha has lived and worked in Europe and South East Asia giving her a global perspective to her efforts.

In addition, Disha is an adjunct professor at California Lutheran University's School of Management. Disha is on the leadership team of Amgen's Women Empowered to be Exceptional business resource group and President of the Healthcare Businesswomen Association (HBA) Los Angeles chapter. She is on the board of Cambridge University's Judge Business School Alumni Council and Miami University's School of Engineering and Applied Science Council.
