

Jennifer M. Paine, MS, RAC, FRAPS
Executive Vice President, Worldwide Quality, Regulatory and Compliance

Jennifer M. Paine has more than 20 years of cross-functional experience in global, executive roles in the health care medical device and diagnostics industry. She is currently Executive Vice President of Worldwide Quality, Regulatory and Compliance at Ortho Clinical Diagnostics, a global leader of in vitro diagnostics. Paine is responsible for leading the company's worldwide quality systems, regulatory affairs and compliance strategy. She is a member of Ortho's Executive Leadership Team and represents the enterprise on the AdvaMed Dx Board of Directors, where she serves as Regulatory Vice Chair.

Prior to her current role, Paine served as Vice President of Regulatory Affairs for Ortho, Therakos, Inc. and Veridex, LLC. Earlier, she held Regulatory Affairs roles with increasing responsibility for Ethicon, Inc., a Johnson & Johnson company, where she also served on the firm's Management Board for its Women's Health & Urology business. Paine started her career in Research and Development (R&D) roles before transitioning to Regulatory Affairs at Baxter Healthcare in Chicago, IL.

Paine has received numerous awards and recognitions throughout her career. She was named Board President in 2018 for the Central New Jersey chapter of the Healthcare Businesswomen's Association. In 2017, she was named to the prestigious "Women to Watch in Med Tech" list published by *Becker's Hospital Review*. She joined the distinguished class of RAPS Fellows in 2015, which recognizes senior regulatory professionals for their significant contributions and leadership in advancing the regulatory profession and the Regulatory Affairs Professionals Society (RAPS). She was honored with four Standards of Leadership Awards from Johnson & Johnson and was recognized as part of *Medical Device & Diagnostic Industry's* Outstanding Quality & Regulatory Teams in 2007.

Paine earned a Master of Science in zoology from Southern Illinois University and a Bachelor of Science in biology from Rhodes College. She holds a Regulatory Affairs Certification from the U.S. Regulatory Affairs Professional Society and a Regulatory Affairs Dual Certificate in Medical Devices and Pharmaceuticals.
