

Joe Lengfellner joined Memorial Sloan Kettering in 2008 as a data analyst, working on various initiatives to capture and analyze clinical trial data at MSK. Over the past 10 years, Joe has worked on many new digital initiatives at MSK, with a focus on streamlining the operations of clinical trials and improving the patient experience. Recently, Joe was appointed Director of Clinical Research Informatics and Technology. In this role, Joe leads a team responsible for management of the technology platforms and tools used for the management of clinical research at MSK. The products managed by Joe and his team include both internal tools used by hospital staff and also technology to promote patient engagement in clinical trials. Prior to MSK, Joe received his undergraduate degree (B.S.) from the State University of New York at Stony Brook in Psychology. It is at Stony Brook where Joe's career in research informatics began, working directly with psychology research labs on the implementation of technology tools for management of research projects.
