

Sandy Kearney has 20 years of experience focused on digital transformation and the technology consulting space. In addition to her business consultancy, Sandy also teaches Computer Science at Villanova University with a specialty in emerging technology: Robotics, Artificial Intelligence, Drones and 3D printing. She brings unique insight to key performance indicators benchmarks and best practices of highly profitable firms in transformation.

As the Managing Partner of Magic Hat Consulting, Sandy works closely with enterprise groups and firms to: improve relative performance, reduce business risk and improve profitability through business consulting; fortify, extend or transform their businesses through digital transformation; enable strategic change and exploration of alternative futures; and achieve premium value activities with effective transformational structures

Before joining Magic Hat Consulting, Sandy was an Assistant Dean at Villanova University. She joined the University from IBM Business Consulting Services and IBM Research, where she led emerging business and research. Sandy has served on the Boards of Directors and is currently CEO of an emerging technology thinktank, e426.org which assists people in starting entrepreneurial companies using new or evolving technology. She is a licensed Pilot and Drone Pilot and retired from the United States Air Force after 22 years as an Air Force Leader and Instructor Pilot.
