

Sander Timmer, Senior Healthcare Industry Solutions Manager for Data & AI, Microsoft

Sander is a Senior Healthcare Industry Solutions Manager for Data & AI, working in Microsoft's worldwide Health and Life Sciences team.

Sander has more than ten years of Data Science experience getting predictive insights out of data. In his current role, his focus is on advancing end-to-end AI solutions for Microsoft most significant EMEA customers and partners in Biotech, Pharma and Public Health. Much of this effort is around creating honest and ethical Predictive Scenarios using Machine Learning and Cognitive Solution using Deep Learning on top of health data.

Sander holds a PhD in Big Data Biology and Genomics from the University of Cambridge and the European Bioinformatics Institute (EBI).
