Women in Science

The Women in Science (WIS) affinity group provides women in scientific roles with professional support through interactive, empowering, educational, & professional development programs.

In a recent HBA survey of members, those who have had a medium to high level of volunteer engagement report:

Women in Science

Mission

- Provide women in scientific roles with professional support for their career advancement.
- Offer interactive, empowering, & educational professional development programs.
- Create a platform for effective networking and collaboration.

WIS membership includes women with training in science, technology, engineering and mathematics (STEM) who are working in the pharmaceutical/biotech sector or other areas within the healthcare industry.

Benefits

- Join HBA's WIS for exceptional access to senior women leaders and inspiring role models in the healthcare industry.
- Our programs provide educational opportunities and networking to women with scientific backgrounds.
